

NOVEL FOOD

# WHAT IS NOVEL FOOD?

Novel Food is defined as food that had not been consumed to a significant degree by humans in the EU before 15 May 1997, when the first Regulation on novel food came into force.

## The underlying principles underpinning Novel Food in the European Union are that Novel Foods must be:

01

- Safe for consumers

02

Properly labelled, so as not to mislead consumers

03

- If novel food is intended to replace another food, it must not differ in a way that the consumption of the Novel Food would be nutritionally disadvantageous for the consumer.
- Pre-market authorisation of Novel Foods on the basis of an evaluation in line with the above principles is necessary.
